-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-18 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 8, 14, 15, and 17 each recite the limitation --a description of the particular geometric pattern-- of the markers. A review of the applicant's specification shows that the label is disclosed as having memory to record "the description parameters of markers 2 and, notably, their geometric coordinates." See page 3, lines 9 and 10. The specification is silent as to the now claimed feature of recording "a description of the particular geometric pattern" of the markers.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Devices having a plurality of "markers" are known in the art as stated by the applicant. These devices constitute an "article of manufacture". It is also known from United States Patent 6,480,100 to Frieden *et al.* to provide an RFID tag; i.e., a "label", having memory stored with manufacturing data. The phrase "description

parameters of markers", as broadly mentioned in the applicant's specification, would be encompassed by "manufacturing data" as mentioned in Frieden *et al.* Providing an RFID tag on a "tool" having manufacturing data stored in the RFID label would allow the manufacturing data to be quickly retrieved via an computerized system vice having to manually enter data.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Rogers whose telephone number is (571) 272-2205. The examiner can normally be reached on Monday - Friday (0730 - 1600). If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
